

EDITOR LETTER

For the twelve time we presents to the readers the monograph "Progress on Chemistry and Application of Chitin and its Derivatives" that is based on the 12th Workshop of the Polish Chitin Society held in Szczyrk September 2006. Progress on chitin and chitosan science was observed and brought us several interesting presentations in fundamental science as well as in applications of these polymers. Our research makes a strong impact at the world chitin science.

I would like to thanks all authors for their effort put in preparing the papers dedicated to this volume of the Monograph. Thanks to you this issue contains such interesting works. Special thanks are addressed to Mrs. Maria Wiśniewska-Wrona M.Sc. and Dr Magdalena Kucharska for their valuable assistance and coordination of the editorial works. I also thank Dr Andrzej Bodek for his assistance during the Seminar and his editorial work

This issue of the Monograph was partially sponsored by the Ministry of Science and Informatization.
