

Polish Chitin Society

**PROGRESS ON CHEMISTRY
AND APPLICATION
OF CHITIN AND ITS DERIVATIVES
(PCACD)**

Volume XXVI

Łódź, Poland 2021

Editor-in-Chief: Malgorzata M. Jaworska

Faculty of Chemical and Process Engineering,
Warsaw University of Technology,
ul. Warynskiego 1, 00-645 Warsaw, Poland
e-mail: malgorzata.jaworska@pw.edu.pl

International Editors:

C. M. Caramella, University of Pavia, Italy
H. Ehrlich, TU Bergakademie Freiberg, Germany
S. Hudson, North Carolina State University, USA
S. Ifuku, Tottori University, Japan
H. Pospieszny; Institute of Plant Protection, Poland
S. Rossi, University of Pavia, Italy
S. Senel; Faculty of Pharmacy, Hacettepe University, Turkey
V. Varlamov; Russian Academy of Science, Russia

CONTENT

Review

U. Jankiewicz, A. Kochańska-Jeziorska, A. Gałązka 5

New Aspects of the enzymatic breakdown of chitin: a review

Review

M. Konovalova, D. Tsaregorodtseva, E. Svirshchevskaya 11

Biomaterials based on chitosan and its derivatives
to prevent adhesion formation

Review

Z. Nuc, A. Dobrzycka-Kraheil 23

From chitin to chitosan – a potential natural antimicrobial agent

Review

K. Pieklarz, Z. Modrzejewska 41

SARS-COV-2 – the latest global threat and the prospect of COVID-19
therapy with the use of chitosan

B. Grimling 61

Effect of selected mucoadhesive polymers on pharmaceutical
properties of chitosan formulations

B. Grimling 71

Formulation and characterization of mucoadhesive dental applications
containing benzydamine hydrochloride

U. Gryczka 80

Long-term radiation-induced effects on solid state chitosan

S. Jagodzińska, B. Pałys, D. Wawro 89

Effect of chitosan film surface structure on the contact angle

Ch. Jeyaseelan, A. Jain, R. Jugade 101

A green method for the removal of zinc(II) ions from wastewater
using modified biopolymers

O. V. Kadyseva, V. N. Bykov, O. Y. Strelova, A. N. Grebenyuk 112

Study of the effect of the physicochemical properties of chitosan
on its haemostatic activity

O. Kalinkevich, A. Sklyar, A. Kalinkevich, V. Chivanov, Y. Zinchenko, Y. Trofimenko, V. Starikov, D. Sofronov, V. Holubnycha	121
Preparation and characterisation of new biomaterials based on chitosan iodide with biologically active dyes	
K. Kopeć, M. Żuk, T. Ciach	135
Hydrogel antibacterial coating for silicone medical devices	
E. E. Kuprina, A. N. Yakkola, A. N. Manuylov, E. I. Kiprushkina, I. A. Shestopalova, P. I. Demidov	148
Development of biodegradable polysaccharide-protein edible gel coat with antimicrobial properties for food products	
K. Malolepsza-Jarmołowska	162
Influence of pectin and chitosan on the properties of gels protecting the oesophageal mucosa	
K. Malolepsza-Jarmołowska	170
Evaluation of hydrophilic globules with sodium alginate containing a lactic acid-chitosan complex	
A. Piegat, A. Niemczyk, A. Goszczyńska	178
Emulsification parameters study on micelles formation from hydrophobically modified chitosan	
K. Pieklarz, M. Tylman, Z. Modrzejewska, G. Galita, I. Majsterek	191
Structural and biological characteristics of self-organising chitosan hydrogels	
B. Ts. Shagdarova, N. V. Karpova, A. V. Il'ina, V. P. Varlamov	200
The effect of chitosan hydrolysate on the fungi ALTERNARIA SOLANI, FUSARIUM SOLANI and RHIZOCTONIA SOLANI in vitro	
K. Szafran, M. Jurak, A. E. Wiącek	211
Effect of chitosan and lipid layers deposited onto polyethylene terephthalate (PET) on its wetting properties
